U. S. Patent Patent No. 84

Greatest of All Late
Yellow Freestone Peaches

AMAZING MONEYYMAKE

Insure Your Profits by Planting
Our Two Exclusive Patented Varieties
Hale Harrison Brilliant and Río-Oso-Gem

Growers of America’s Best Quality Fruit Trees
New! Exclusive! Sensational!

YELLOW FREESTONE

The World’s Greatest Peach

The sensational Peach which has caused the greatest amount of favorable reports of any Peach introduced in a half century of that marvelous big Peach, the World’s Largest being a paternal relative is the Rio-Oso-Gem, U. S. Patent No. 84. It has now been tested in all Peach-growing districts in the United States and Canada, and has distinctly proven itself to be the best all-around commercial Peach. Ask any man who has grown the Rio-Oso-Gem.

THE BEAUTIFUL GLORIFIED PEACH

This beautiful Peach has a brilliant, bright red color, running around the good red, whereas they are easy to pack on U. S. Fancy grade. The size of the Peach is all that anyone can expect as many of these Peaches will run a pound or more in weight and in many instances have been reported as the crop would average three quarters pound per Peach. The Flaming, beautiful bright red color in the cheek, along with an attractive orange colored background, has earned it an enviable reputation as being the prettiest Peach grown.

BEST FLAVORED COMMERCIAL PEACH

The unexcelled flavor is better than that of J. H. Hale and Elberta. The enticing flavor makes it a very popular Peach for fresh eating. The rich flavor is retained when canned or preserved. Now recognized as the leading canned Peach on the California market. Rio-Oso-Gem is the only Peach which can be processed to quick freezing and still retain its firm texture, with its beautiful rich, golden yellow flesh and the same flavor as when picked. We have quick frozen Rio-Oso-Gem Peaches which were picked and processed on September 1, 1944, which are still holding up in excellent condition.

RECORD BREAKER FOR LONG DISTANCE SHIPMENTS

The Rio Oso Gem is the best of all Peaches for long distance shipments and the fruit will stand up longer after being picked than any other variety of Peach in existence. This stupendous variety adapts itself exceedingly well for shipments in refrigerator cars cooled, under standard refrigeration for transcontinental hauls. This is the greatest Peach for shipments on trucks under ventilation, as its hard, firm texture insures arrival in excellent condition.

RIO-OSO-GEM

Ideal for Home Orchards

Ripened 10 days faster than Elberta. Rio-Oso-Gem is a very prolific bearer and dependable annual cropper.

RIO-OSO-GEM IS NO EXPERIMENT

Colonel Heilig and Mrs. Frank Sleeter, Round Hill, Virginia, wrote: “We have the land ready for the 400 Rio-Oso-Gem peach trees, 5 to 6 feet for April, 1950 planting. It is a wonderful peach and we have had marvelous results marketing it last year at $6.00 per bushel, in spite of the low market price prevailing during the summer of 1949.”

DESIGNED TO BE
America’s Leading Commercial Peach
Sample of Rio-Oso-Gem Grown in Harrisons’ Orchards at Berlin, Maryland, sold only by Harrisons’ Nurseries in numerous states.

READ WHAT FELLOW GROWERS SAY

We have received several hundred complimentary letters highly praising the Rio-Oso-Gem Peach. U. S. Patent No. 84, from all over the United States, some of the typical remarks were from growers such as Russell-Draheim-Alderson Company, Forest City, Arkansas. “We have about 1,000 of Harrisons’ Rio-Oso-Gem Peach trees from which we have been harvesting the largest and finest Peaches I have ever seen. We sold our Elberta Peaches, U. S. No. 1 grade at $2.25 per bushel and we had no trouble in picking the Rio-Oso-Gem Peaches 2 1/2 inches and up which we sold at $4.00 per bushel, t. o. b. Forest City, Arkansas.”

Mr. H. Frank Smith, Prop. Hillcrest Orchard, Dover, Arkansas, writes: “This year’s crop convinces me that the Rio-Oso-Gem, U. S. Patent No. 84 is the very finest Peach and has certainly proven such with me. It has very fine qualities as a canner and people go wild about it. It always brings the highest prices for me.”

Mr. Charles Heilig, Sewell, New Jersey, Gloucester County, said that the most handsome and the best Peach of the forty years’ experience that he has had was his first crop of Rio-Oso-Gem on 400 trees, three years old, which he picked from early September 324 bushels and which he sold at an average price of $5.00 per bushel at his farm, grossing him more than $1,600.00 from this very young orchard. He bought 420 Rio-Oso-Gem trees for planting November, and said his future plantings would be Rio-Oso-Gem.

AMERICA’S MOST FAMOUS PEACH

Mr. E. R. Connor, fruit grower and broker of Stephen City, Virginia, in the famous Frederick County fruit section, was exceptionally well pleased with his first crop of Rio-Oso-Gem Peaches on his three-year-old trees over which he picked during early September. From his 400 trees, three years old, he picked 300 bushel crop for which he was offered $3.75 per bushel, f. o. b. Stephen City, Virginia; for the entire crop, but he refused the sale so that he could sell the Peaches in smaller quantities at high prices to his customers throughout the Shenandoah Valley of Virginia and nearby cities. He planted 100 more trees two years ago which had a few Peaches on them this summer. Connor states that he had 5,000 Rio-Oso-Gem Peach trees. U. S. Patent No. 84, planted in his Orchard instead of 500.

RIO-OSO-GEM IS A “MUST” FOR EVERY GROWER

There are still big, commercial Orchards that have not grown or tried Rio-Oso-Gem Peaches, providing you draw the right varieties and in the near future you will see where the Rio-Oso-Gem, U. S. Patent No. 84 will be getting more prominence each year. It is predicted that within a decade or so, it will be the most extensively planted commercial Peach in America.

[2]
The Peach of the Future

HALE HARRISON
U. S. Patented BRILLIANT No. 814

Sensational! New! Colossal!

Yellow freestone ripening during midseason at about the same time as Elberta. The fruit is nearly fuzzless and has a brilliant cardinal red almost completely covering a golden yellow ground color even when growing in shade in the interior of the tree. Fruit throughout the tree is uniformly large even when unpruned or unthinned. Tree is large, vigorous and rapid grower. Self pollinating, it bears tremendous crops year after year. Very hardy in bud and blossom and highly resistant to brown rot. Keeping qualities are excellent.

FOR HOME OR COMMERCIAL ORCHARD

Whether you are going to plant one tree for home fresh eating, canning or freezing or one thousand trees for a commercial orchard, we enthusiastically recommend Hale Harrison Brilliant as the best peach to plant. It will give you more pleasure to eat or more profit in growing than any other peach known today.

WILL REPLACE ELBERTA

For many decades Elberta has been the standard peach of the world by which all peaches have been judged, tested and observations by leading peach authorities confirm our belief that the new sensational Hale Harrison Brilliant surpasses the Elberta in every way.

OUTSELLS AND OUTBEARS

Hale Harrison Brilliant outclasses them all. It is really the one peach that has everything. Its beautiful attractive appearance, huge size, superior delicious flavor makes it have extraordinary favorable eye appeal, resulting in higher prices. This combined with its BUMPER crops, "Original tree has produced over two hundred bushels a year" make it the outstanding moneymaker.

WIDELY ADAPTED

Hale Harrison Brilliant has been planted in thirty-four states. Reports from these plantings prove it is equally as adaptable to the far south as it is in central and western areas and it even produces highly satisfactory in Canada and other northern peach sections.

LONG PICKING SEASON

One of the finest features of Hale Harrison Brilliant is its early coloring, the golden yellow ground color appears weeks before it begins to ripen, this is the one peach that has a high sugar content even when it is hard. Fruit growers have been amazed at its ready to eating color and general smooth skin appearance several days before it is ready to pick and ship, this means a long picking season. Records show that it surpasses in keeping qualities any other peach on long distance shipments.

HARRISONS AMAZING GUARANTEE

Several years of testing in co-operation with leading fruit authorities convince us as to the outstanding merits of Hale Harrison Brilliant that we can make the following guarantee, "Each and every Hale Harrison Brilliant is a true reproduction of the original strain, it will produce more satisfaction to you than any other peach variety that ripens during its season, on proper proof of failure to do this we will furnish you without charge an equal number of peach trees of any other variety that you desire."

Back of this guarantee are the resources of Harrison Brothers Nurseries with an enviable record of sixty-eight years in the Nursery and Orchard business.

GENUINE HALE HARRISON BRILLIANT PEACH TREES GROWN AND SOLD EXCLUSIVELY BY HARRISON BROTHERS NURSERIES, BERLIN, MARYLAND.
Dear Friends:

For sixty-seven years the business of the Harrisons’ has been to grow Fruit Trees, Roses and Ornamental Nursery Stock, also commercial fresh fruit growers—this business has grown and developed only through a thorough understanding of the science of horticulture in all its phases with practical use.

Now when you buy nursery stock—remember all of it is a living plant—the pedigree, or parents, play an important part in the future results of the very tree you buy—the “hidden value” is the inborn inheritance that becomes the final quality, type, strain, size, color and productiveness so necessary in the future performance—and right here is the very feature which makes HARRISON grown nursery products have superior merits.

HARRISON’S Fruit Trees and Small Fruits are true to name, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornaments are of the finest types for their respective varieties.

In closing, may we personally take this opportunity of thanking our many customers for their continued confidence, for which we are sincerely grateful.

Sincerely yours,
HARRISON BROTHERS NURSERIES
G. Hale Harrison, Gen. Mgr.

MARVELOUS NEW
Earliest Ripening Yellow Freestone Peach
Genuine Shinn’s Delicious
Trade Marked
Trees Grown and Sold Only By Harrison Bros. Nurseries

A true mutation, being very early ripening budspout strain of Burbank July Elberta, U. S. Plant Patent No. 15, discovered by Mr. C. T. Shinn and Mr. L. S. Smith in their orchard near Russellville, Arkansas. Identical in large size, beautiful red color with handsome golden yellow background color, yellow flesh, freestone and superior flavor as its parent, however, its most appealing characteristic is that it ripens three weeks sooner, between Red Bird and Red Haven, making it about five weeks earlier ripening than Elberta. Every peach grower should make a planting of Shinn’s Delicious this year. We know you will want more of them when you see the fruit. Shinn’s Delicious (“Trade Marked”) is an exclusive Harrison variety and only genuine Shinn’s Delicious trees can be obtained from Harrison Brothers Nurseries, Berlin, Maryland. Many growers say it is better than Starking Delicious peach U. S. plant patent No. 806.

BURBANK JULY ELBERTA U.S. PLANT PATENT NO. 15

The Outstanding Medium Early Commercial Peach

Here is the peach that has caused a sensation wherever fruitful. Growers in many sections say it is their best medium early, yellow, freestone peach for shipping, local markets and home use. Beautiful golden yellow, almost completely overspread with brilliant red. Ripens about the same time as Hale Haven, but on account of its vivid red color and yellow background with no green color, it can be picked for commercial shipments about four days sooner. Excellent in flavor, even superior to Hale Haven for fresh eating, freezing and canning. Hardy, sure cropper, large size, a sensational money maker. July Elberta is known by different names such as Burnett Elberta, Burbank July Elberta, Kim Elberta, Burbank Elberlta. We offer an outstanding strain selected from bearing trees. Season of ripening about two weeks sooner than Elberta (“Original Strain”):

HERE'S A "LOAD" OF REASONS WHY HARRISONS' PEACH TREES ARE BETTER

A—Our organization has over 65 years' experience.
B—Every step in growing under the personal supervision of the Harrison Brothers.
C—One hundred and fifty thousand trees in Harrison Brothers' orchards from which our propagating trees are selected.
D—Use of modern methods for planting, cultivating and digging.
E—Over 4,000 acres of various types of soil.
F—Ideal soil and climatic conditions.
G—Co-operation with leading horticulturists and experimental stations all over the world.

Very Early Varieties

DIXIRED. Very early, yellow, cling, medium size, round, bright attractive red blush; good flavor; prolific bearer. Ripens two weeks earlier than Golden Jubilee or about three days later than Red Bird. A new variety originated and introduced by the U. S. Department of Agriculture. Its most outstanding commercial feature is that it is a good shipper and has been planted extensively in Georgia to meet the demands for the very early Peach market.

DIXIGEM. Early, yellow, semi-freestone, red blush, medium size, good quality. Ripens a few days sooner than Golden Jubilee. A new variety originated and introduced by the U. S. Department of Agriculture. Extensively planted in Georgia.

FAIRHAVEN. Early, yellow, freestone, medium large, nearly round, mostly bright golden in color with an attractive bright red cheek. Skin is smooth and very tough. Fruit very firm and ships exceptionally well. Ripens just after Golden Jubilee.

JERSEYLAND (N. J. 135) — Ripens a week sooner than Golden Jubilee, large, firm, attractive yellow flesh, freestone. Tree is hardy, sets buds freely. Introduced by New Jersey Experiment Station.

HARRISON—A Name in Trees You Can Trust
The Sensational
REDHAVEN
Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

THE NEW EARLY RIPENING YELLOW PEACH THAT RIPENS ABOUT 10 DAYS BEFORE GOLDEN JUBILEE

The most promising early ripening yellow freestone Peach ever introduced. A cross between Hale-Haven and Kolhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Redden before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

HALE-HAVEN

Early midseason. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening just after Golden Jubilee and should be planted in every orchard. Excellent for fresh eating and quick-freezing.

HALE-HAVEN PEACH—Extra Large, Fine Flavored

A LEADER and
What a PEACH!

GOLDEN JUBILEE

Early. The supreme early yellow Peach. Peach orchardists for a century have been looking for an early Peach of high quality, fine flavor, yellow freestone, attractive color and firm texture, and eventually they have found it in the marvellous Golden Jubilee. Fruit bright deep yellow, medium to large size, oblong shape. Good size, fine appearance and excellent quality with delicious flavor. Ideal for roadside stands and home orchards, also commercial orchards for nearby city shipments. It ripens about ten days earlier than Hale-Haven.

HERE IS THE HIGHLY FLAVORED EARLY WHITE FREESTONE PEACH YOU HAVE BEEN LOOKING FOR

CUMBERLAND

An outstanding favorite early white Peach. Is a comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Golden Jubilee.

GOLDEN JUBILEE PEACH—Yellow, Excellent Quality

A GREAT PEACH COMBINATION—REDHAVEN, GOLDEN JUBILEE, HALE-HAVEN
**Harrisons' Peaches**

*ARE A COLLECTION OF THE WORLD'S BEST*

**TRIOGEM (N. J. 70)**

Developed by the Master Plant Breeders of New Jersey

**MEDIUM. TO LARGE. FIRM. ATTRACTIVE.**

Ripens early, medium to large, oval, firm, high quality, high red color over entire Peach, yellow flesh; freestone, smooth, nearly fuzzless like J. H. Hale, one of its parents; colors several days in advance of its ripening, being 2 days later than Golden Jubilee, or 3 weeks earlier than Elberta. This, combined with its very slow rate of softening, makes it an ideal Peach for commercial growers. Hangs well to the tree after the Peaches become firm ripe. When picked hard to firm it is a good long distance shipper. This is the best commercial Peach ripening at this period, and is being planted now by some growers in preference to Golden Jubilee. Considered as the best new variety of Peach so far originated and introduced by the New Jersey plant breeders.

**A REAL PROFIT MAKER.**

TRIOGEM has been fruiting commercially in New Jersey and Maryland for several years. During this time it has topped all varieties in price on the New York and Philadelphia markets which ripen at this time during the season. Several large commercial orchards have been planted with Triogem and its popularity is increasing each year.

**CHAMPION. A Good Home Peach.** White, freestone, very large, creamy white with red cheek, which softens slowly, making it a good commercial Peach. Excellent flavor; rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning. Gleason strain which ripens three days earlier than Elberta.

**REDSKIN.** A new variety introduced by the University of Maryland. Midseason, yellow, freestone, large, roundish, blushed, firm flesh, firm, very high flavor. It is a cross between J. H. Hale and Elberta, which ripens shortly before Golden Jubilee. Vigorous, good growing tree and productive.

**VEDETTE.** Early yellow freestone. Globular; large; good red color; good flavor. Canadian variety of the Elberta type. Ripens about six days after Golden Jubilee. Adapted to Southern as well as Canadian Peach districts.

**SUNHIGH. (N. J. 82.)** A large, red, bright, smooth Peach which ripens well all over before it ripens, softens slowly, making it a good commercial Peach. Flesh inclines to adhere to the pit when ripe. The variety seems to do best in hilly sections and can ripen as late as the last week of September. The fruit is large, roundish, thick skinned, very uniform in size. Color deep yellow with red cheek. Stone is free. Ripens approximately 18 days before Elberta, at a time to bring high market prices.

**HILEY.** White. Early midseason. Bears huge crop of fancy Peaches. Freestone, medium size, highly red colored and has a very handsome Peach of exceptionally good flavor. Tree is strong grower. Very healthy and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets. Hiley resembles Belle of Georgia but ripens about 14 days earlier.

**SOUTHLAND.** Early midseason, yellow, freestone, medium to large, round, attractive red blush with mild, good flavor. Originated by the U. S. Department of Agriculture, being an ideal peach for the extreme Southern peach Belt. Vigorous tree, productive and fruit ripens at the same time as Hiley. Promising commercial peach.

**SUMMERCREST. (N. J. 94.)** Midseason, yellow, freestone, large with red blush and sweet flavor. Trees exceptionally vigorous, fruit ripens the same time as Belle of Georgia, which is a few days earlier than Elberta. Popular in New Jersey where it is known.

**GOLDEN EAST. (N. J. 87.)** Early midseason. Very large, high red color, yellow, freestone. Very good flavor. Ripens 15 days earlier than Elberta. Good roadside market and commercial Peach.

---

**HARRISON'S SUPER-SELECTED STRAIN VARIETIES BEAR BIGGER AND BETTER CRABS OF PEACHES.**

**INCREASES YOUR PROFITS AT NO EXTRA COST**

---

---
Belle of Georgia

The Queen of Flavors

THE BEST WHITE MID-SEASON VARIETY

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best and endorse it highly.

SULLIVAN EARLY ELBERTA

An Early Ripening Red Bud Sport of Elberta

MIDSEASON YELLOW—FREESTONE

Here is the early ripening strain of original Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about seven days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

10 OUTSTANDING REASONS FOR PLANTING SULLIVAN EARLY ELBERTA

1—Size: Large to Extra Large.
2—Yellow Freestone.
3—Rich, Sweet Flavor.
4—Brilliant Red Colored with Golden Yellow Background. Excellent Long Distance Shipper.
5—Tree Vigorous Grower.
6—Bears Large Crops Annually.
7—Colors a Week Earlier than Elberta.
8—Ripens Slowly After Being Picked.
9—Brings Highest Market Prices.
10—Completely Tested.

Harrisons' Maryland Grown Peach Trees are the Finest Quality in the World
Save Disappointment—Plant Only Harrison ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown on original strain trees gives sufficient reason why they sold this year at a premium of $1.00 to $2.00 per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrison's heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

Mid-Season Late

A Profitable Commercial Variety Slightly Later Than Elberta
Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past thirty years we have planted thousands of this variety in our own orchards and they have given good results.

The fruit is rich yellow, with dark orange cheek. The size runs fully as large or larger than Elberta. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta. Good shipper.

Popular On the Markets
Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know the grower who needs a Peach ripening slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrison's Original Strain
HARRISON'S were the first to popularize this great variety and distribute it throughout the Peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.
Genuine
SHIPPERS LATE RED

Midseason-Late. Large, round, yellow, freestone, very attractive with high red color. It is a Hale type of Peach, having good quality and brings high prices on the fruit markets. Ripens three days later than Elberta. A good commercial Peach as it is a prolific bearer of large size, highly red-colored Peaches and is a favorite wherever planted. Harrisons are growing the original strain of Shippers Late Red which is far superior to other types and strains of this variety. Should be planted in every commercial orchard, as well as home orchards. Dependable trees which are absolutely "true to name."

Harrisons' Maryland Grown Peach Trees are the Finest Quality in the World

Late Ripening Varieties

LATE ELBERTA. (Gemmer's Late Elberta.) Late, yellow, freestone, large, high red color, fine quality, good shipper. Is a typical Elberta in fruit and tree characteristics, but ripens 4 to 5 days later than Elberta of the original strain.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 14 to 16 days later than Elberta, having same prominent coloring characteristics as its parent.

May be assorted varieties of Peach Trees. For Jumbo Peach Trees, see page 17. Write Us About Your Planting Requirements.

Harrisons' volume production has enabled us to supply you with high quality nursery products at low prices. All varieties are within reach of any home planter and fruit grower and priced to save you money. We ship everywhere. State and Federal inspected.

SHIPPERS LATE RED PEACH

SALBERTA. A Late Commercial Peach. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey. This new variety is planted commercially in many Peach-growing sections. Ripens about 12 days later than Elberta. A good shipper.

RIO-OGO-GE.M. Late. See page 2 for description and prices. Starts to ripen 10 days later than Elberta.

AFTERGLOW. (N. j. 84.) Late midseason. Yellow, freestone, large, round with high red blush, ripens about 5 to 6 days later than Elberta.

VERY LATE RIPENING VARIETIES

KRUMMEL'S (Krummel's Late October). Yellow, freestone; extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor.

SALWEY. Very late. Yellow, freestone.

WHITE HEATH CLING. Large, late cling, fine flavor, good home Peach

A WHOLE ORCHARD
FOR ONLY $2.50

Five Varieties of Apples for Fresh Eating from Late June Until Early November produced on the same tree

Here’s the opportunity for those with limited space to have five mighty desirable varieties of Apples, all budded on one tree for a little more than the cost of one tree. Requires only 20 ft. space when fully grown. Each tree is budded to Large Transparent for first summer variety, Williams Early Red, Red Gravenstein, Triple Red Delicious and Yellow Delicious for autumn varieties, Scarlet Red Stayman and Red Rome Beauty for winter varieties.

Budded to 7 varieties, however, guaranteed to have 5 or more.

2 year, 4 to 5 feet, well branched at $2.50 each.

2 year, 5 to 6 feet, extra well branched with good heads, at $3.25 each.

Jumbo Size, 3 year, 6 to 8 feet, extra well and heavily branched with beautiful heads at $4.50 each.

---

If Your Space Is Limited

Plant one or two of these novel trees. You will have a variety of Apples maturing over a long season. Desirable as an ornamental and shade tree, as well as for its fruit.

Grow Your Own DELICIOUS! NUTRITIOUS

ASPARAGUS It’s Easy with

Harrisons’ “Big Yield Strain”

MARY WASHINGTON

Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

SAVE A YEAR!
PLANT JUMBO THREE-YEAR

Mary Washington Asparagus Roots

Yes, you can grow your own delicious tender Asparagus quick by planting our jumbo size roots. These roots are the cream of our three-year-old crop and have already borne large, early, tender, juicy Asparagus in the nursery. This is the selected pedigreed Mary Washington strain and is far superior to other kinds.

New Gigantic Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does not send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do not remove the tender skin; it cooks right up with the stalk.

Heavy plants: $1.00 each; 6 for $5.40.
Because They Are

- Absolutely true to name.
- Healthy and vigorous.
- Disease-free.
- Hardy—budded fruit trees are superior to grafted.
- Properly hardened out before digging.
- Come into bearing earlier.
- Yield bigger crops of better fruits.
- Have larger roots.
- Take hold quickly in new locations.
- The best trees for less money.
- Propagated from bearing trees of selected strains.

**WILLIAMS’ EARLY RED**

The Big Red Home or Market Apple

Just at the time when people are hungry for a fresh, new red Apple, this superb sort comes into market. In New York, Boston, Philadelphia, and other eastern cities as well as middle western and southern cities, the fruit sells as quick as it hits the market-house or dealer’s store. It holds its own anywhere and has proven to be.

The Best Summer Apple

The rich bright red fruit catches the buyer’s eye and is ordered at a price that yields the grower a good profit. Apple is large, with tender crisp, white flesh, juicy, slightly tart. The trees come to bearing when quite young, producing freely and steadily. Fine for a filler or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All orchards should include Williams Early Red.

A good pollinizer for Red Yorkins and Red Rome Beauty Apple trees.

**SUMMER APPLES**

**LARGE TRANSPARENT (Lodi)**

A New Summer Variety

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type.

Semi-dwarf, bearing very young, it makes an excellent pollinizer. The skin is a clear yellow, white flesh, of medium size. A good pollinizer.

**EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT**

Yes, actual profits, that’s what we mean. It can be done—here’s why: Yellow Transparent Apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easy on its big brother, “Large Transparent,” which ripens at the same time.

Large Transparent Apples Average Up to 1/2 Inch Larger Than Yellow Transparent—This Means $1.00 to $2.00 per Bushel Extra

**OTHER SUMMER APPLES**

- **STARR**. Large, attractive with bright yellowish, smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, tender, crisp, juicy, aromatic and of fine quality. High flavor. Relatively good keeper. Old variety, most extensively planted in North. Tree is very hardy, withstands unusually cold climates, vigorous, fruits at early age, bears regular, and abundant crops. Tree somewhat dwarf, making a fine filler.

- **DUCHESS OF OLDENBERG**. Large, striped, tender, juicy, sub-acid, good, regular and abundant bearer. One of the hardiest. Best pollinizer for early blooming varieties.

- **TWENTY OUNCE**. Very large, fine quality, yellow striped red.

- **WEALTHY**. Medium to large size; round, almost solid red; flesh white or a little stained, tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety, most extensively planted in North. Tree is very hardy, withstands unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

- **EARLY McINTOSH**. Resembles its McIntosh parent in appearance, but is less aromatic. An attractive, uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually if thinned early and severely. The shape and framework of the tree, especially the heavy-budded branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

- **RED SUMMER RAMBO**. A new earlier coloring solid red strain means much greater profits for growers everywhere.

- **SUMMER RAMBO**. Large, splashed with red.

- **EARLY RED DUCHESS**. Highly colored early Apple brings premium prices. This bud sport color red all over early in the summer. Excellent pollinizer for Red Gravenstein.

- **YELLOW TRANSPARENT**. Medium size, greenish yellow, very heavy bearer. Mostly praised yellow variety.

- **RED GRAVENSTEIN**. See description page 15. Excellent summer apple.

To Make One Tree Do the Work of Two, Plant Harrisons’ Bud-Selected, Heavy-Bearing Strains.

(12)
GRIMES GOLDEN

Harrisons' Selected "Big Yield" Strain—Best Home Orchard Apple

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, producing the best flavored Apple known, and a good pollenizer. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollenizer known, especially for Stayman Winesap, Lawry, Baldwin, Cortland, Rome, Winesap, and many others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

YELLOW DELICIOUS It's Golden!

A golden yellow Apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall.

Delicious

Sometimes Called Stark Delicious—This is the Original Strain of Red Delicious

Of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting, flavor sweet, with a slight acid taste, with a delightful aroma, very high quality. Fall. Harrisons' T. Red Delicious is superior.

McINTOSH RED

Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best flavored McIntosh known. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull striped kind. We recommend you plant this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

OTHER GOOD APPLES

STAYMAN WINESAP Big Yield Strain. Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to its annual lines until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

SMOKEHOUSE. Large Apples of superb flavor, excellent for eating, yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

WINESAP An Apple favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored Apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and an excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized Apples with plenty of color.

YORK IMPERIAL. Medium to large size, round, irregular, greenish yellow, overlaid with bright red, very good keeper, tree large, firm and a good pollenizer.

MAMMOTH BLACK TWIG (Peragen). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, large keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinizer.

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong erect grower, very healthy, extremely hardy and a free producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age.

NORTHERN GREENING. Large, round, greenish yellow; juicy, firm, of good quality, splendid keeper, ships well. Attractive Apple when packed in bushels, demands good prices, excellent baking Apple. Should not be planted extensively because trees are not so certain due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RHODE ISLAND GREENING. The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel Apple, brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROME BEAUTY. Large, round, red, flavor and quality above average.

RED LOWRY. Red bud sport strain, identical with its parent Lowry in all respects with the exception that it has much higher red color and when matured full red color. It can be picked 2 to 3 weeks earlier than Lowry, due to its earlier in season and color. Interplant a few Grimes Golden as a pollinizer.

DOUBLE RED BALDWIN. A new dress for this old reliable variety. Solid deep red color, much earlier than ordinary Baldwin. The color makes it sell better. This new strain will bring new profits to the grower of Baldwins. Late fall.

CRAB RASPBERRY. A new variety resulting from cross pollinization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red Apple, approximately the same size and fine flavor of the McIntosh, but ripens 3 weeks or a month later. Good keeper.

CALLA Beauty. A Rome Beauty type of Apple identical in every respect except its earlier coloring qualities; recommended for commercial planting. Harrisons' have the genuine original strain of Calla Beauty.

JONATHAN. Medium to large, red, juicy. Good keeper and an excellent shipper.

KENDALL—A most attractive McIntosh strain—new variety. Try a few trees to see how it grows.

SPARAN—A cross between McIntosh and Yellow Newton, very worthy of a trial planting.

CRAB APPLES

Priced on page 12 Double Purpose—An Ornamental and Fruit Tree Combined.

HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Handsome.

5. Tests Show They Come Into Bearing Sooner.
7. Completely Tested.
8. Excelled by No Other Red Bud Sports or Strains.
10. Greatest Profits.

SCARLET RED STAYMAN
BRILLIANT COLOR
We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked early if desired.

A Ready Market at Top Prices
Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

FOR JUMBO APPLE TREES SEE PAGE 17

SOLID RED WINESAP
Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

THE APPALACHIAN WINNER RED YORKING
(U. S. Plant Patent No. 125)
The Red Yorking is a “bud sport”, being a mutation of the famous York Imperial. This “bud sport” originated on a tree, grown with other York Imperial trees, in Harrisons’ Nurseries and later sold to Mr. W. H. Allison, near Shippenburg, Penna., for use in planting a large orchard about 40 years ago.

Superior to all Other Tested Strains
PLANT BIG TREES for QUICKEST and BEST RESULTS

SCARLET RED STAYMAN—Tops with Many Growers
RED YORKING—Big Craps [14]
RED VARIETIES
Flavored Apples

HOME OR COMMERCIAL ORCHARDS

RED ROMe BEAUTY
An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and is superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is well known for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy, Pacific Coast strain. Has always been very popular.

NEW STRAINS OF RED ROME
Can supply two new additional red bud sport strains known as C. and O. Red Rome also C. and O. Red Rome number 262.

SUPER RED McINTOSH
A new strain of McIntosh Red that starts coloring earlier and produces a larger percentage of extra fancy fruits. Super-Red McIntosh, when allowed to mature on the trees, is slightly darker in color than our regular improved McIntosh Red. Has all the best qualities of ordinary McIntosh and will mean larger profits for growers who have been unable to get sufficient color. McIntosh has been the favorite in the North; this new strain extends the planting area farther South. The most highly colored solid red strain available, regardless of price. We have some exceptionally good one-year trees and fine two-year trees to offer this season. Plant McIntosh strain of Apples for big profits, equally as good in home orchards as it is commercially.

HARRISON BROTHERS NURSERIES, BERLIN, MARYLAND

RED SPY—Bears Crisp, Juicy Apples

RED SPY
A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every apple being solid red in color. We recommend it for commercial and home plantings in northern states.

BRIGHT RED JONATHAN
We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain of Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

RED GRAVENSTEIN
Here is the Apple that has been overlooked by eastern growers. Old-fashioned Gravensteins have been grown in tremendous volume during the past twenty-five years, mostly in California, a few in the Eastern States. The old strain lacks the color to make it sell. Our new Red Gravenstein colors a solid bright red long before it is ripe. The quality of Red Gravenstein is extra good for an early Apple and its ability to carry to distant markets, even after it gets solid red, makes it command the highest prices.
For home, for canning, for market the best Pears during summer. A golden-colored Pear, with a red cheek on most specimens, Bartlett mellows and is excellent for eating very early in the fall; yet when picked a week before it is ripe and properly stored, will keep till late. Flavor delicious and musky, flesh buttery, firm and juicy. One of the finest Pears that grow to eat raw. A mingling of the flavor of Bartlett Pear and Quince gives the finest taste of any fruit that the world's folks have. Bartlett trees bear early, produce enormous crops, and are not nearly so subject to damage by insects and disease as some other sorts. The trees do especially well with high culture.

Fancy Bartlett Pears Bring Highest Prices

Bartlett Pears always sell on the market even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bartlett or bushel boxes are best. The fruit needs to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack Apples. Pears are sometimes packed in Peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping in small baskets or boxes.

One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit. A half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER

SURE CROPPER—EASY TO GROW

Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hard, and thrive on varied soils in any climate. Kieffer and Koonce are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet is the leading commercial Pear in Canada. Kieffer is blight resistant, and can be successfully planted in large orchards. This fruit is large to very large size; skin yellow, with light vermillion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning Pear.

BEURRE BOSC. Large size, fine quality, brings highest market price. Late.

BEURRE D'ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hard, prolific bearer. Very late.

CLAPP'S FAVORITE. Large size, hard, and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter Pear of wonderful quality, golden yellow, with a faint blush on the cheek. Bears early.

DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

GORMAN. Flavor is sweet and vinous, with a very marked and pleasing aroma. Flesh is white tender, buttery and juicy. VALuable for dessert and canning. Now.

KOONCE. One of the earliest Pears, tree from blight, does not rot at the core like many early Pears. Fruit is yellow, medium to large, delightful flavor. Very productive. Extra good for Southern states.

SECKEL. A beautiful and delicious little Pear. One of the richest and highest flavored Pears grown. Tree dwarf, bears 12 to 15 dozen. Late.

WIDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

NOW IT IS EASY TO GROW FRUIT WITH NEW, ALL-PURPOSE SPRAY
Spray your peach, apple, pear, plum cherry, apricot and nectarine fruit trees with one pound of PARATHION 115% strength powder, a sensational new insecticide, best for general use ever discovered, which will kill all insects, along with three pounds of WETTABLE SULPHUR, paste type preferred, for the control of Rot and other fungus diseases to fifty gallons of water. Parathion makes it easy to grow high quality fruits in your garden and home orchard.

Harrison Brothers Nurseries
BERLIN, MARYLAND
Harrisons’ Maryland Grown Jumbo Fruit Trees are the Finest Quality in the World

For a New Orchard or for Replanting Bearing Orchards Use Jumbo Bearing Size Fruit Trees for the Quickest and Best Fruitig Results Why Waste Space with Missing Trees? Superior Strains Earliest to Bear True to Name

GUARANTEED TO LIVE AND GROW SATISFATORILY
Harrisons’—The Nation’s Fruit Tree Nurseries
HARRISONS’ Profitable EASY TO GROW Sour Cherries

Montmorency

The most popular Sour Cherry, grown in America. It ripens midseason, is large, red, slightly acid, flesh very tender, good quality. The best shipper of all Sour Cherries; always commands the highest market prices in city markets or commercial canneries. When preserved at home or commercially, it is always attractive in appearance and of extra good quality.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish red Cherry. Hardy and productive. Very late.

May be Assorted Varieties of Sweet Cherry Trees. For Jumbo Sweet Cherry Trees see page 17.

SWEET CHERRIES

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

BING. Very large, dark brown, flesh firm, sweet. Midseason.

BLACK TARTARIAN. Very large, sweet, purple black color, juicy rich flavor, heavy bearer and most profitable sweet variety grown. Early.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor. Midseason.

LAMBERT. Extra large, sweet, jet black, very popular. Midseason.

NAPOLEON. Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.

SENECA. Resembles Black Tartarian, but ripens two weeks earlier, rich sweet flavor.

SCHMIDT. (Schmidt’s Bigarreau.) Large, sweet, deep black, tender, fine flavor. Midseason.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

YELLOW SPANISH. Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light-colored Cherries. Hardy bearer. Midseason.

HANSEN’S IMPROVED Bush Cherry

An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introdu
ced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect.

3-Year Bushes, Bearing Size. $1.00 each; 10 for $9.00.

For Jumbo Cherry Trees, see page 17.
ABUNDANCE. Early. Large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasant aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BIG MACKEY. Late. Largest and best Damson, being an improved strain of Shropshire Damson freestone. Deep purple, juicy, rich flavor, small stone. Fine for preserving. Easy to grow, produces immense crops. Should be planted in every orchard. Large size fruit makes ideal jams, preserves and jellies. An excellent variety for fresh fruit shipments to city markets, always demanding high prices.

BURBANK. Early. About one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FORMOSA. A midseason variety of excellent and prolific bearing qualities. Large greenish yellow, overlaid with red. Alternate bearer. Heavy cropper.

ITALIAN PRUNE (Fellenberg). Late. Medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE PRUNE. Late. Commercial variety. Purplish black, juicy, sweet, excellent bird bearing.

LOMBARD. Midseason. Medium size, showy purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

BRADSTREET. Very large, fine early Plum; dark violet-red, juicy and good. Very productive; valuable for market. Quality is excellent, color attractive. Good canning variety.

METHLEY. A recent introduction which is rapidly gaining popularity due to its fine quality and handsome appearance. The fruit is medium to large in size, reddish purple in color with red flesh. It is juicy, sweet and at distinctive flavor. The tree is vigorous and upright in growth habit. Does well on most types of soil and is a heavy annual bearer.

RED JUNE. Early. Medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

SANTA ROSA. Early. Fruit very large size, round, purplish red, flesh reddish near skin, fine, juicy and has a pleasant tart flavor of exceptionally high quality.

SATSUMA. Midseason. Best flavored semi-free- stone, blood-flesh Plum known. Large size. Flesh dark purplish red, juicy, sweet, possessing an alluring aroma. Originated by Luther Burbank.

SHIRO (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent, covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late. Medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson is really nothing.

STANLEY PRUNE. Midseason. Freestone, large, new prune variety, outstanding characteristics. Consumed fresh, excellent for cooking and fresh fruits.

WICKSON. Midseason. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

YELLOW EGG. Late. Large, golden yellow. Good for cooking. Largest and handsomest of yellow Plums.
Grow Finer Flavored Berries
With Harrisons' Select Certified Raspberry Plants

LATHAM
WORLD'S LEADING RASPBERRY

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are prais- ing the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect you will be both delighted and surprised after giving it a trial.

Large Berries—
Tremendously Productive

Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert, covers a larger fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size at the end of the season. Color dark, rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

Every Garden Should Have

INDIAN SUMMER
Sensational New Everbearing Raspberry

A dish of big red juicy Raspberries sprinkled with sugar and swimming in pure cream, it can be yours for every meal from June into July, and again from mid-September until frost, if you will plant Indian Summer. Makes tasty, scarlet-red sauce or pie and the finest jams and preserves you ever tasted. Frozen Indian Summer Raspberries is like having them fresh from your garden the year around.

Indian Summer Raspberries are no experiment; they have fruited successfully for thousands of gardeners in nearly every section of the country. This is truly a champion for your garden. Order early.

The Most Popular
Black Raspberry

CUMBERLAND
Midseason to late. This is the most popular Blackcap at the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive. The bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

Here's Another Extra Good Blackcap
The Mammoth New MORRISON

This brand new variety has been a sensation wherever planted. Mammoth sized berries, glistening jet-black color, rich flavor, fewer seeds, heavy producer. The thrifty, strong, hardy plants are heavily rooted and disease resistant. Easy to grow, excellent for canning, eating fresh, freezing. Ripens slightly later than Cumberland.

NEW THE SENSATIONAL
Boysenberry

HARRISON BROTHERS
BERLIN, MARYLAND

The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches in Length
NEW LOWER PRICES

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all brambly fruits. They are just as easy to grow as Blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

1

Lucretia Dewberry

Long, mammoth black berries, recognized as the leading variety. In- comparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big, uniform size makes them top- natchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 Plants: 6 for $1.20; 12 for $1.75; 25 for $2.75; 50 for $4.75; 100 for $8.25; 250 for $17.80.

ELDORADO BLACKBERRY

A Heavy Yielding Blackberry that Spells Success Everywhere

sized in Eldorado. Berries of enormous size, shiny jet-black, sweet

For Home or Commercial Planting. It is valuable for all purposes, both home and commercial, being so firm that it will remain in good condition for three and four days, and can be sent to distant markets where it always commands the highest price. This variety is making big money for other growers and it will do the same for you.

NEW LOWER PRICES OF BLACKBERRIES: Selected plants, 1-yr., No. 1 grade, 6 for $1.45; 12 for $2.10; 25 for $3.30; 50 for $5.70; 100 for $9.90; 250 for $21.40.

GOOSEBERRIES

RED JACKET. Big, roundish oblong berries, with a mild sweet flavor. Delicious for fancy desserts, salads, conserves, pies, etc. Bushes lovely as shrubs. Small, yellow bloom.

DOWNING (Green). Large greenish yellow variety favored for shipping and canning. Highly flavored. Large, 1-yr. bushes, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.

NEW RED LAKE CURRANT

WILDER. One of the strongest growers and most productive. Bunch and berry large, bright, attractive red color.

Large, 1-yr. bushes, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.

CURRANTS

NEW RED LAKE. Biggest, sweetest, finest improved Red Currant on the market. Large bunches, produced in profusion. Extra hardy.
NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart, $400.00 per acre the third year. They are exquisitely mild, sweet and delicious, and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotten leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties to insure proper pollination.

Very Ornamental

As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blooms and open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or Rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel and Jersey.

Prices: Jumbo size 4-year-old, 2 to 3 ft., $2.50 each; 3 for $6.75; 10 for $20.00.

LEADING BLUEBERRIES

CABOT. Plants seldom exceed three feet in height and make a broad low bush. The color of the new growth in winter is a light red over alive. The large berries have a delicious sub-acid flavor.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

Harrison Brothers Nurseries
BERLIN, MARYLAND

[22]
HARRISONS' BIG YIELD GRAPE VINES
BEAR BETTER CROPS
OF BETTER FRUIT

Harrison Brothers Selected Varieties Grapes

CAGO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

NIAGARA. White. Midseason. Best of the standard light colored Grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

CONCORD
Harrisons' Super Strain

Blue, midseason. The most popular and extensively planted Grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

For Quick Crops Plant
JUMBO GRAPE VINES

Big crops of luscious Grapes, some the first season planted. No other fruit bears so much for so little attention. Our Jumbo Grape Vines have already fruited in the nursery.

We can furnish the following varieties only in Jumbo size; listed in their order of ripening: Fredonia, Warden, Concord, Agawam, Niagara, Catawba.

Prices: 90c each; 3 for $2.40; 6 for $4.20; 10 for $6.50; 25 for $13.75; 50 for $25.00.

Juglans nigra
Rapid grower, spreading branches, large delicious nuts, prolific bearer. 2 to 3 ft., $2.00 each.

PECANS—Abundant Nuts in Winter

[23]
Pick World's Finest Strawberries From Your Own Plants

A Big Profit From Your Own Back Yard

Everybody prefers the flavor of vine-ripened Strawberries. They are more delicious and sell for 15c to 25c more per quart. Customers pay premium prices for garden fresh Strawberries and small growers make real money, up to $500.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrisons' "Big Yield" Strawberries. Others are doing it, why not you. It costs only a few dollars to get started.

Extra STREAMLINER
The Greatest Everbearing Strawberry

SWEET AS HONEY—EXTRA LARGE
EXCELLENT FOR EATING FRESH OR FREEZING
MAKES HEAVY FRUITING BED

• Berries in 90 days or less. No need to wait several months. Plants planted in March or April will commence bearing in early July and bear until frost.
• Three Big Crops From One Planting. Streamliner needs no nursing along as some everbearers do. They are thrifty growers, and do not require exacting soil requirements. Pick your first crop this summer and fall, second crop next June, third crop the following summer and fall.
• It costs less to grow your own berries if you plant Streamliner. Easy to grow, just space them 12 to 15 inches apart in the row with the rows 3½ to 3½ feet apart.
• Profitable to raise. Grow all the berries you need for your own use and sell the rest to your neighbors.

Harrisons' Everbearing
MASTODON
A TRIPLE YIELD

1—Plant this spring.
2—Pick first crop, July to frost.
3—Pick second crop, June next year.
4—Pick third crop, August to frost next year.

3 REAL CROPS—3 BIG PROFITS
Boons in 90 Days, and, too, It's the Best Family Garden Strawberry—Loads of Big Berries in 90 Days.

Unlike the other varieties, Mastodon begins to bear luscious berries 3 months after planting and bears three big crops in 18 months. Customers have reported yields as high as three quarts per plant the first fall.

WHY WAIT A WHOLE YEAR?
Plant Harrisons' "Big Yield" Mastodon this spring, and grow your own berries this summer and fall, instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will bring top prices.

Harrisons' Big Yields Plants Are Better

1—Sixty-five years' experience in growing, propagating and handling Strawberries.
2—Every plant propagated by Harrison is the offspring of a selected plant that is outstanding in vigor and productivity.
3—Absolutely free from diseases and insects.
4—Grown on specially nurtured high ground soil.
5—Our method of digging enables us to get all the roots.
6—Clean, graded and packed in modern packing house.
7—Absolutely true to name.
8—Prompt service.
9—Better plants for less money.

Four Undisputed Strawberry Leaders

**STRAWBERRY GARDEN OFFER**
No. 21
25 BIG JOE  25 PREMIER
25 FAIRFAX  25 CHESAPEAKE
ALL FOR $3.75

**BLAKEMORE**
No Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable, producing big crops every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and preserving because it holds its color and shape so well.

**DORSETT, Early**
Large Fruit— Vigorous Grower—Heavy Crops
Dorsett berries average larger size, considerably larger than the Premier; in fact, their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, being far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

**FAIRFAX, Early**
The Sugar-Saving Berry
Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

**PREMIER**
The Old Reliable
**BIG JOE** The Old Reliable
Midseason Variety
LARGE YIELD— FANCY FRUIT— FINE FLAVOR
Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plant is an excellent grower and heavy yielder. This variety succeeds on all types of soil but does extra well with good care and fertility. Be sure to include Big Joe in your planting this spring. Our big yield strain insure big crops.

**CHESAPEAKE** The Favorite
Midseason Variety
The Favorite
Late Berry
It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first class condition. An exceedingly valuable commercial berry but equally adapted for home planting. We offer a selected "Big Yield" strain.

**RED STAR** HERE'S A NEW ONE
Extra Good— Very Late
This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large and are born on short, stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row, and plenty of money can be made from growing this one, as late berries always bring a high price.

**CATSKILL** Midseason Variety
A midseason berry that will produce the largest crops of bigger berries of any midseason variety. Catskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaptation. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton, it is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

**TEMPLE** The Successful New Variety— Can Be Grown Anywhere.
**Here is the Easiest Berry to Grow**
If you have ever tried raising Strawberries and failed, here is the berry for you to try. It will grow on light, sandy soil as well as heavy, water-soaked kinds. The quality of this berry is excellent and its plant growing characteristics are supreme. Berries are extra large, firm, beautiful in appearance, fine texture and flavor. Excellent for freezing, canning, eating fresh, also local and long distance shipments. This berry is the result of years and years of cross-breeding work and is unquestionably the finest new berry for both commercial and home plantings that has been introduced in many years. It has our highest recommendation.

Harrisan Strawberry Plants Are Bred Up far Bigger Yields and Tell the Stary at Harvest Time.
EVERBLOOMING HYBRID TEAS

ETOILE DE HOLLANDE. At present considered most popular of crimson Hybrid Teas. Very colorful, crimson with delicious fragrance, and enormous petals. Its charmis continuous, with its delightful color, vigorous growth, and well-formed flowers on large stems. Faultless editor McFarland. A very fine, brilliant pink Rose, destined to gain popularity.

GOLDEN CHARM. All that its name implies. Deep golden bush opening to clear golden yellow. One of the best yellow Roses and grows successfully throughout the nation.

KAISERIN AUGUSTE VIKTORIA. Perfect cream, white blooms slightly tinged with lemon, large and full. Long shapely buds to full petalped; deliciously scented bloom. An old favorite that every today, has not been surpassed.

PINK RADIANCE. A brilliant carmine-pink with yellow shading at base of petals, having a light ivory tone on the inside, and deeper on the outside. Vigorous, free bloomer parent of Red Radiance. Among the oldest Roses, it has made good everywhere.

PRESIDENT HERBERT HOOVER. One of the outstanding Roses. A glorious new Rose of violet cerise-red toned with yellow, orange and scarlet, richly perfumed and free flowering.

RED RADIANCE. A sport of the famous Radiance and identical in all characteristics, except color. A brilliant cerise-red color, and intensely fragrant. Tall and bushy, healthy foliage and excellent blooming qualities. The favorite red Rose of America's millions.

The Colorful PEONIES

THEY RIVAL THE ROSE

Once planted they last for years. There should be several planted in every yard. Their large, bright-colored flowers in May and June furnish an abundance of flowers for the home. Can supply the following colors: WHITE, PINK, and RED. Sizes vary. Prices: 75c each; 3 for $1.95; 10 for $5.50.

Condesa de Sastago

Everblooming Hybrid Teas

CONDESA DE SASTAGO. Marvelously colored Rose with long cupped flowers of cerise-red inside and rich yellow outside. A profuse bloomer at all times, it keeps well when cut, and is especially fragrant. Compare it to Radiance Rose in vigor and hardness.

GOLDEN DAWN. Considered the finest yellow Rose. Blooms of soft lemon-yellow-tinted with old rose markings, long-lasting fragrance of real tea scent. Hardy, bushy, medium height, and very vigorous.

WHITE RADIANCE. A genuine white sport of the ever-popular Pink Radiance. Very vigorous, tall and bushy. Thrives extra well; intensely fragrant. Should be in every garden.

POINSETTIA. Brilliant rich scarlet-red. Huge, ideal long pointed buds; glorious flowers. Vigorous, tall grower, long stems, and richest scarlet-red. Grand, being a very fine Rose. Should be planted in every Rose garden.

TALISMAN. A multi-colored, glorious combination of orange, yellow and rose-red. They simply eclipse other Roses in autumn. Fine for decoration and cutting. The triple-tone flowers are produced all season.

HARRISONS’
DECORATIVE EVERGREENS
Our Splendid Trees Embellish the Grounds of Beautiful Homes the Country Over

SPREADING YEW

The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardest of all Yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. Prices: 12 to 15 inches $2.50 each.

GOLDEN RETINOSPORA

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Feather, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen. Price: 12 to 15 inches $2.00.

COMPACT GLOBULAR ARBOR-VITAE

Natural compact, globe-shaped, dark green foliage. The ideal low growing plant for massing against the taller evergreens in foundation plantings. Price: 12 to 15 inch $2.00.

AMERICAN ARBOR-VITAE

Probably no evergreen is more admired than American Arbor-Vitae with its beautifully carved foliage of deep green, its graceful, refined habits and its artistic upright shape. These features make it indispensable in the home foundation groups and in the lawn and garden plantings. Price: 18 to 24 inch $2.50 each.

IRISH JUNIPER

Forms a narrow and dense column, compact, bluish green foliage. Most attractive when planted around the foundation of a home at corners and entrances. Price: 18 to 24 inch $2.50 each.

All evergreens are shipped with Moss on the Roots.

American BOXWOOD
GROWN BY HARRISON BROTHERS
BERLIN, MARYLAND

—the real Aristocrat of the Evergreen family

YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISONS’

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

Let's Plant More
American BOXWOOD
(Buxus sempervirens)

A BROTHER OF “YE OLDE ENGLISH” BOXWOOD
—It Grows Much Faster

PRICES OF AMERICAN BOXWOOD
10 to 12 inches $1.50 each; 10 for $12.50

HICK'S YEW
(Taxus cuspidata Hicksi)

HICK'S YEW
Another form of Yew that is very similar to the Irish Yew, but is a much faster grower. The branches ascend almost vertically, generally growing with many stems. Its rich dark glossy green makes it much more attractive than Arbor-Vitae or Junipers. Price: 12 to 15 inch $2.50 each.
AMERICA'S FINEST FLOWERING

RED FLOWERING DOGWOOD
(Cornus Florida Rubra)
One of the most popular small ornamental trees. Handsome red flowers in early spring. Makes an attractive lawn specimen.

Plant 1 to 2 feet apart
NORTHERN STRAIN

CHINESE
ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in two short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except that its leaves are smaller, with the gracefulness of a Cut-Leaf Birch. Prices: 5 to 6 ft. $1.75 each; 6 to 8 ft., $2.25 each.

ORIENTAL PLANE
(Platanus Orientalis)
A rapid, upright, clean growing shade tree, long lived, beautiful demesne foliage. A superb tree of gigantic proportions, which is very hardy. The Orientar Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrisons' Nurseries are specializing in growing Oriental Planes and we are the largest growers in America. Prices: 6 to 8 ft., $3.50 each; 8 to 10 ft., $5.00 each; 10 to 12 ft., $7.00 each; 12 to 14 ft., $11.00 each.

AMERICAN ELM
(Ulmus americana). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a tall vase. Prices: 5 to 6 ft., $1.75 each; 6 to 8 ft., $2.25 each.

LOMBARDY POPLAR
A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. Prices: 5 to 6 ft., $1.00 each; 6 to 8 ft., $1.50 each.

CHINESE CHESTNUTS
Now You Can Grow Chestnuts!
Blight-Resistant Chestnut Trees

Only two years from this fall, right in your own grounds, you can pick big, fat tasty Chestnuts from the trees you plant this year! Remember gathering Chestnuts in the good old days—haven’t you felt sorry for your children because they couldn’t? The devastating blight that stripped our forests of the native Chestnut was an American tragedy! Now these hardy, blight-resistant Chestnut trees will bring them back. More than that, you need not wait 15 to 20 years for nuts—they’ll bear year after year!
Plant in abundance Harrisons’ strain of Chinese Chestnut Trees.

PRICES: 2 to 3 ft., $2.50 each.

AMERICAN FILBERT
(Hazel Nut)
Old family favorite. Small, attractive bush, yielding abundant crops of tasty round nuts. Bears very young.

PRICES: 2 to 3 ft., $2.00 each.

ENGLISH WALNUT
(Juglans Regia)
Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

PRICES: 2 to 3 ft., $2.75 each.

CHINESE ELM—Quickest Growing Tree in the World

WEEPING WILLOW
A rapid growing, hardy tree, thriving in any moist soil. The Willows are valuable and interesting subjects on account of their graceful aspect. Prices: 5 to 6 ft., $1.50 each; 6 to 8 ft., $2.25 each.

NORWAY MAPLE
Typical Maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Prices: 6 to 8 ft., $4.00.
California Privet is the Leading Low Cost Hedge Plant

**California Privet**
*Ligustrum ovalifolium*

This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For live fences at village, town and country homes it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be easily kept at any height desired; has glossy, deep green leaves, and holds them until late fall. Its strong, quick, upright growth makes it useful for screening out unsightly objects.

**SPIRAEA VAN HOUTEI**

Always Makes an Attractive Hedge

**GREEN BARBERRY**
*(Berberis Thunbergii)*

The best low dense hedge plant grown. Its abundant, small light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

**BUSH ARBUTUS**
*(Abelia Grandiflora)*

By far the best evergreen shrub. One of our beautiful, popular and satisfactory broad-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.

<table>

**RED-LEAVED BARBERRY**
*(Berberis Thunbergii Atropurpurea)*

A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping. It thrives well in our climate, and can be worked out with the shrub foliage depended on for color. Red berries during winter.

**HARRISONS' HARDY VINES**

**NATURE'S DRAPERY**

**BOSTON or JAPANESE IVY** *(Ampelopsis Veitchii)*

A popular climber, clinging firmly to brick, stone or other material; deep, glossy green, ivy-shaped foliage which turns to cream and gold color in autumn. Price: $1.00 each.

**CHINESE WISTARIA**

A rampant growing, clinging vine. Blue flowers in large, drooping clusters during May and June. Price: $1.25 each.

**ENGLISH IVY** *(Hedera Helix)*

The most popular evergreen vine; large, deep green, glossy foliage. Excellent for covering walls. Useful for shady locations. Price: $1.00 each.

**HALL'S HONEYSUCKLE**

Deep glossy green foliage; fragrant flowers from July to fall. Price: $1.00 each.

**SWEET AUTUMN CLEMATIS** *(Clematis paniculata)*

A splendid climber for covering porches and trellises. Flowers showy white, produced in immense quantities during late summer and autumn. Price: $1.00 each.

**SILVER LACE VINE** *(Polygonum Auberti)*

Will rapidly grow 20 feet or more. Forms clouds of lacy, misty white, shot with tints of cream and pale rose. Good covering, foliage, lightly bronzed at tips. Price: $1.25 each.

SYRINGA, SWEET MOCK ORANGE or GARLAND ('Philadelphus Coronarius'). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB ('Calycanthus Floridus'). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and wood have a spicy fragrance.

TAMARIX, AFRICAN ('Tamarix Africana'). Feather gray-green foliage; very showy.

TARTARIAN HONEYSUCKLE ('Lonicera Tatarica'). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK ('Weigela Rosa'). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

PINK MAGNOLIA
('Magnolia Soulangeana')

Our most outstanding early spring blooming plant. Large pink blooms. Grows in bush or tree form. Every garden should have one or two of these remarkable plants.

Prices—Strong Field Grown Plants—Each $2.75
2 for $4.70.

ROYAL BLUE HYDRANGEA
('Hydrangea Otaksa')

Old favorite southern Hydrangea. When winters are severe we suggest heeling in. Large balls of blue flowers and attractive large leaves. Color depends on acidity of soil. Field-grown plants, $1.50 each; 2 for $3.00.
